

Non stop parking access control systems eliminates individuals need to fumble for change, swipe cards or punch numbers in a keypad. Vehicles can move smoothly through controlled entrances. There are no cards to read, tickets to read and sort, and the whole system is a convenient, hands-free way to ensure easy vehicle parking. Inexpensive and easy to install, operate, and maintain.

- Streamlined back-office operations.
- Scalable system to fit current and future needs.
- Automatic data capture and detailed reporting.
- Improves traffic flow at peak hours.
- Reduction in time spent searching for parking.
- Vehicles can move smoothly through controlled entrances.
- Integreable with range of Hardwares.
